**RE: PDFN Enterprise Partnership Proposal**

Dear Sarah Johnson,

I hope this letter finds you well. Following our conversation at React Summit last month, I wanted to formally present our enterprise partnership proposal for your consideration.

PDFN provides server-side PDF generation using React components and Tailwind CSS. Our solution has helped over 500 companies streamline their document workflows, reducing development time by an average of 60%.

We believe PDFN would be an excellent fit for Acme Corporation's document generation needs. Our enterprise plan includes unlimited PDF generation, priority support, and custom integrations tailored to your existing infrastructure.

I would welcome the opportunity to schedule a technical demo with your team. Please let me know if you would be available for a call next week to discuss how PDFN can help Acme Corporation.

Best regards,

---

**Alex Chen**

Head of Partnerships, PDFN
